

# Recycling Works

## Benefits of Recycling

- Reduces the amount of waste sent to landfills and incinerators.
- Conserves natural resources such as time, water and minerals.

## Benefits of Recycling

- Increases economic security by tapping a domestic source of materials.
- Prevents pollution by reducing the need to collect new raw materials.

## How to Recycle a Plastic Water Bottle

Once you finish drinking your water you may want to put it in the trash.

But there is a better way way to get rid of your water Bottle

And the answer is

### Recycle

Step 1 - Finish drinking your water

Step 2 - Don't even think about throwing it away

Step 3 - Find a recycling bin and throw it in there

Fun Facts about recycling:

1. Use cloth towels instead of paper towels
2. Shop for products made for recycled material
3. You can also compost

## How Recycling Helps the Environment

Recycling helps so we don't have a whole bunch of trash in forest, lakes, rivers, oceans, and roads.

Recycling can also save animals lives. Animals think plastic and other stuff is food. Small animals can even get stuck in some things.
